Precautions

- To minimize the risk of improper installation Rockville recommends that the installation of this product be performed by an MECP-Certified professional installer.
- Improper installation may cause damage to the vehicle or injury to the driver and occupants.
- Installation must be performed in accordance with this product installation manual. Rockville is not responsible for damage or injuries resulting from installation not performed strictly in accordance with the procedures described in this manual.
- Proper installation of this product may require the use of mounting hardware not included.
- Use only new, unused and properly-sized fasteners to install this product. Do not use previously installed or worn fasteners.
- No modifications to the product or mounting hardware are permitted.
- This product is designed to be used and viewed by rear seat passengers only. The monitor screen must not be visible to the driver. Viewing by the driver while operating the vehicle is not recommended.
- Rockville does not recommend connecting wires or cables to auxillary connectors while the vehicle is in motion.
- This product must not obstruct the driver's rear view when installed or used.
- Rockville bears no liability for any property damage or personal injury that may result from improper or unintended installation or use of this product.

Resetting the Unit

- Turn the engine key to the "OFF" position
- Unplug the wire harness for five seconds. This will engage a full reset.
- Re-plug the harness.
- Turn the engine key to the "ACC" or "ON" position
- Press and hold the power button for 3 seconds
- The unit will turn on.
- If this procedure does not resolve your issue, please contact customer service for further assistance.

Powering the Unit

- Turn the engine key to the “ACC” or “ON” position
- Press and hold the power button for 3 seconds
- The unit will turn on.
- When the engine key is turned to the “OFF” position, the unit will turn off.

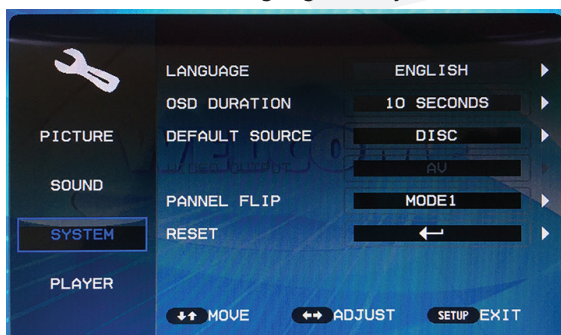

Tip: If the unit does not turn on, check to ensure all wires are connected properly. It is strongly suggested you seek out the help of a professional when installing.

Tip: Most functions can be accessed from the control panel, but more in-depth functions can only be performed with the remote.

User Interface

Unit Settings

- Adjust the unit settings for optimal playback.
- Selected items are highlighted by blue box.

Switch Media Devices

- Press and hold the USB/SD/MODE button (USB/SD button on remote) to switch between Disc, SD, and USB input.

Tip: Refer to DVD and USB/SD sections for a list of playable media formats.

Media Files

- Press the Return button on the remote to browse the files stored in connected SD or USB device.

- If using remote control to play game, use the ▲ / ▼ / ◀ / ▶ on the remote to control game play. Use the ENTER key to confirm function of item in game.
- Use the RETURN key to exit game.

Interchangeable Covers

Chassis Cover

1. Remove the unit from vehicle roof and place on a flat surface. Remove the chassis cover using the included removal tool. Insert the tool into the slot found to the left and right of the AV outputs on the rear of the unit to release the cover.

2. Carefully pull the cover up and away from the chassis.

3. Attach the new cover to the chassis as shown in the diagram below. Be sure to secure the contact points in the order shown.

Interchangeable Covers

Screen Cover

1. Remove the unit from vehicle roof and place on a flat surface. Remove the screen cover using the included removal tool. Open the screen to approximately a 45 degree angle. Insert the tool into the groove found along the top edge of the screen to remove the cover.

2. Carefully pull the cover away from the screen.

3. To attach the new cover to the screen, align the hooks on the cover to the corresponding slots on the outside bottom of the screen. Be sure to secure the contact points in the order shown.

Installation Guide

Install Instructions

- To prevent short circuits, remove key from the ignition and disconnect the RED (+12V) cable from battery terminal.
 1. Disconnect the original dome light.
 2. Detach metal mounting plate from Rockville unit.
 3. Attach the metal mounting plate to the roof (see fig.1) using self tapping screws (not provided). Make sure screws attach to interior roof liner.
 4. Connect ground wire harness in the following order:
Ground wire (black)
ACC wire (red)
 5. Attach the unit to the metal mounting plate using the screws removed in step 2.
- Connection may vary depending on vehicle make and model. Rockville recommends that the installation of this product be performed by an MECP-Certified professional installer.

WARNING:

- Be careful not to screw and puncture the exterior roof.
- Use only the screws supplied.

Install Precautions

- This unit should be install by a qualified technician or service personnel.
- This product is designed to operate with a 12V DC, grounded battery system.
- Use proper insulation and fastening materials to prevent electrical short-circuiting.
- Do not connect the red wire of this product directly to the battery terminal. Remember to connect the red wire of this product to the ACC of the ignition key switch. Failure to do so may result in draining of the battery charge prematurely.
- Do not install this product at a position that may cause injuries to the passenger(s) during an accident.
- Due to different car specifications, please ensure that the display monitor is suitably located.
- Do not install this product at a declining angle exceeding 30°.

Wiring

Troubleshooting

No display	Check for loose or disconnected cables. Check input mode settings on the on-screen menu. Check ground cable. Make sure the area it is attached to has no rust or corrosion and is clean. Make sure ground connection is very tight and secure.
No sound/distorted sound	Check for loose or disconnected cables. Try using different FCA cables. Check audio output menu settings.
No power	Check for loose or disconnected cables (power and ground). Check for blown fuses. Make sure to replace fuse with one of the same type.
Poor quality playback	Check the disc for scratches. Clean the disc if needed.
Disc Error is displayed on screen	Turn the unit off and then back on. Check that the disc has been inserted properly: label side up. Check that the disc is in the proper format. Check region settings (PAL/NTSC).
USB/SD files unreadable	Check USB thumb drive/SD card for damage. Check that media files are in the proper format. Media files may be corrupted.
Remote control does not work	Check for any obstructions between the remote and the remote sensor on the unit. Check the remote battery. Bring the remote closer to the unit. Make sure you've removed the plastic tab from the battery compartment.
